EIMS DATA DISAGGREGATOR

It has always been our intention to replace the Excel Data Disaggregator with an EIMS version of the disaggregator with at least the same capability. The EIMS Disaggregator will be released in two Waves (1 & 2).

The first wave of the EIMS Data Disaggregator report will be available for your division's use on July 5th. You will be able to view online and paper assessment data for all of Fall '04 and whatever Spring '05 SOL data that is available from Harcourt. New data will be loaded into EIMS from Harcourt at the end of each week (you will still receive CD's for the time being).

The Excel Disaggregator is still available for downloading from the DOE web site; however this is the last year it will be supported.

Access to EIMS is obtained from the division's EIMS Project Manager.

The Preliminary Data is staged in a separate database. After all divisions have signed their ATP the data will be considered final and will be moved into the permanent warehouse. The Disaggregator reports will be available for use in both environments. The preliminary data will still be available for about one year (one cycle of assessments-spring, summer, fall).

Wave 2 of the EIMS Data Disaggregator will be tested by mid-July and plans are to make it available by the end of July. We are also working on a training plan for the EIMS Data Disaggregator.
